

Ladies / Gentlemen,

For your Immediate Attention - attached are the following documents:

1. **ii Notes to Accompany COVID-19 Mandate Document – Practical Application**
2. **iii Provisional_improvement_notice**
3. **1. Letter to WHS Manager**
4. **APPENDIX A_COVID-19 VACCINE MANDATE OHS_WHS Risk Assessment for the Workplace**
5. **APPENDIX B_Instrument of Authorisation**
6. **APPENDIX C_Transcript Senator Malcolm Roberts**

Currently there are a lot of court cases trying to stop the Vaccine Mandate with no success, the Magistrates are stating that the Public Health Act trumps all other acts in relation to the Mandate. What they don't understand is that the Vaccine mandate is issued onto the Workplace therefore the Work Health & Safety Act is the relevant legislation pertaining to health that is valid not the Public Health Act. Please note we will not need to go through the courts for this risk assessment process!

The document I have compiled is based on OHS / WHS legislation whereby all stakeholders in the workplace are obligated under the Duty of Care requirements to provide a safe workplace. In order for this to occur all workers and their representatives **MUST** be consulted especially those who will be directly affected. Serious issues are raised in this document as to the safety of the vaccine (DNA Altering & Potential Carcinogen - Cancer causing).

Additionally, the adverse reactions currently recorded by the TGA - Therapeutic Goods Administration list four serious illnesses:(1) Myocarditis & pericarditis (2) Thrombosis with thrombocytopenia syndrome (3) Guillain-Barre Syndrome (4) immune thrombocytopenia.

These all very serious illnesses that can be life threatening and can seriously affect the quality of life of the sufferer. The workplace will potentially become hazardous if any worker suffers a serious adverse reaction relating to these vaccines.

The risk assessment document is a legally binding tool for you to use either to raise the awareness of your employer to the serious health concerns about the Vaccines - (if you have a good relationship with the boss and believe once they become aware of the safety issues, they will halt the mandate immediately as they will realize they are liable for any damages to workers.)

Or if the boss is not responding to your concerns about the vaccine, it gives you the authority to sign and issue to the employer as notification of a serious safety breach of the WHS Act - failure to provide a safe workplace. You as part of the workplace are obligated to raise any safety issues as part of the Duty of Care requirements. Make sure you get two copies both signed by all parties, leave one with your employer and take the other and file securely. Once you have issued this document to the employer raising the serious safety and health concerns of these vaccines, they are obligated to take them very seriously. Most bosses will hopefully realize that if they proceed by enforcing the Mandate, they will be liable for any damages the workers may encounter from the vaccine. Please refer to the steps document for further guidance.

The WHS Act -2020 has just passed through parliament and will be in effect January 2022. The potential maximum penalties for serious breaches could be industrial manslaughter which is a criminal offence. (refer to APPENDIX D_WHS WA Act – 2020 – Penalties – Industrial Manslaughter.)

For the Business owners who raised serious concerns about their liability - **you will need to confirm (in writing) with all employees that YOU have NOT enforced the vaccine mandate and that the employee proceeded on their own accord to be vaccinated.** You could also use the risk assessment document to raise the awareness of other business owners of the potential for liability even possibly industrial manslaughter should they not push back against the mandate.

Compensation for injuries will be only available from the Employer!

Big Pharma

Government (minor comp \$5k to \$20K),

Doctors & Nurses

Health insurers (due to vaccines being an experimental treatment.)

ALL WILL NOT BE LIABLE. YOU ARE ON YOUR OWN IF YOU GET VACCINATED!

People we all need to push back against this poisonous vaccine! The government has absolutely no liability for any injury or harm caused. I strongly recommend that you come together as local communities to support each other using the Risk Assessment document and the WHS Law to raise awareness and reject the mandate.

I would like to refer you to passionate lawyer I am working closely with Andrea Tokaji if you require legal advice, her website is www.andreaconsults.org

I have also listed some options for industrial relations options on the steps WHS document.

People as you may know I am absolutely passionate about stopping this vaccine madness and will provide assistance when and wherever possible. I am hoping this provides you with a valid legal option to push back hard against this evil agenda.

You can also access these documents on telegram at the channel - You've Got This!

Regards

Paul
